IS IT A BIRD ?

- ⇒ small bird remedies and their relationship with row 3 of the periodic table
- ⇒ differentiation of Raptors, Seabirds and Passeriformes
- ⇒ live case day—witness the experts at work!

We are so happy to welcome back the Joshis to the South West !

On **Saturday 17th May** the world renowned team of Bhawisha and Shachindra will be looking at small bird remedies and how they relate to the issues of Row 3 of the Periodic Table. This has been likened to the stage in human development of the young child, establishing their identity. We will also look at how to differentiate between the Passeriformes, Raptors and Seabird remedies.

On **Sunday 18th May** we will have a live case, videoed into the main hall. An opportunity to witness masters at their craft - followed by detailed observation of the nuances of the case taking process. This will include how to avoid being hijacked by the patient's story and how to stay on message. We will finish with more information on bird remedies.

The Joshis have a wealth of clinical experience. We can look forward to video clips from their many case studies illustrating how theory becomes practice.

Early Bird before 4th April 2014
