

# Journey into a Child's world

## A Two-day seminar on Paediatrics

### Dr Samir Chaukkar

M.D. (Homeopathy) H.M.D. (UK)  
F.B.I.H(UK), DND, P.G.Hom (London)  
P.G. Addictions Treatment (Canada)

is a Professor of Materia Medica, Philosophy and Repertorisation & an international speaker. He has done his MD in Homeopathic Paediatrics and has a vast experience of 20 years in the treatment of Children Complaints. He has presented many seminars and papers around the globe on paediatric disorders and his passion and interests are in working with Children, Addictions and Auto Immune diseases.

Prescribing for children is a challenging and yet a fascinating experience as often they do not have the verbal proficiency of adults. From his work Dr. Chaukkar observes, recognises and places valuable behavioural hints in their true perspective. Every act or gesture the child performs is like an actor who draws your attention to his inherent characteristics.

In this seminar Dr. Samir Chaukkar will:

- Demonstrate the importance of observation and mother's history during pregnancy;
- Convert symptoms into rubrics and clarify your understanding of paediatric rubrics from the repertory;
- Compare and contrast remedies used in paediatrics and how to differentiate children remedies homeopathically;
- Share clinical tips in relation to paediatrics;
- Share his innovative method of case taking and case analysis to make you all confident about every paediatric case and taking prescribing to a whole new level;

In this seminar Dr. Chaukkar will guide you to a greater understanding of children and their ailments and how to use these as markers in our 'Journey into a Child's world'.

**11th & 12th October 2014**

**10:00am - 5:00pm**
